

ADHESIVE TECHNOLOGY INSPIRED BY NATURE

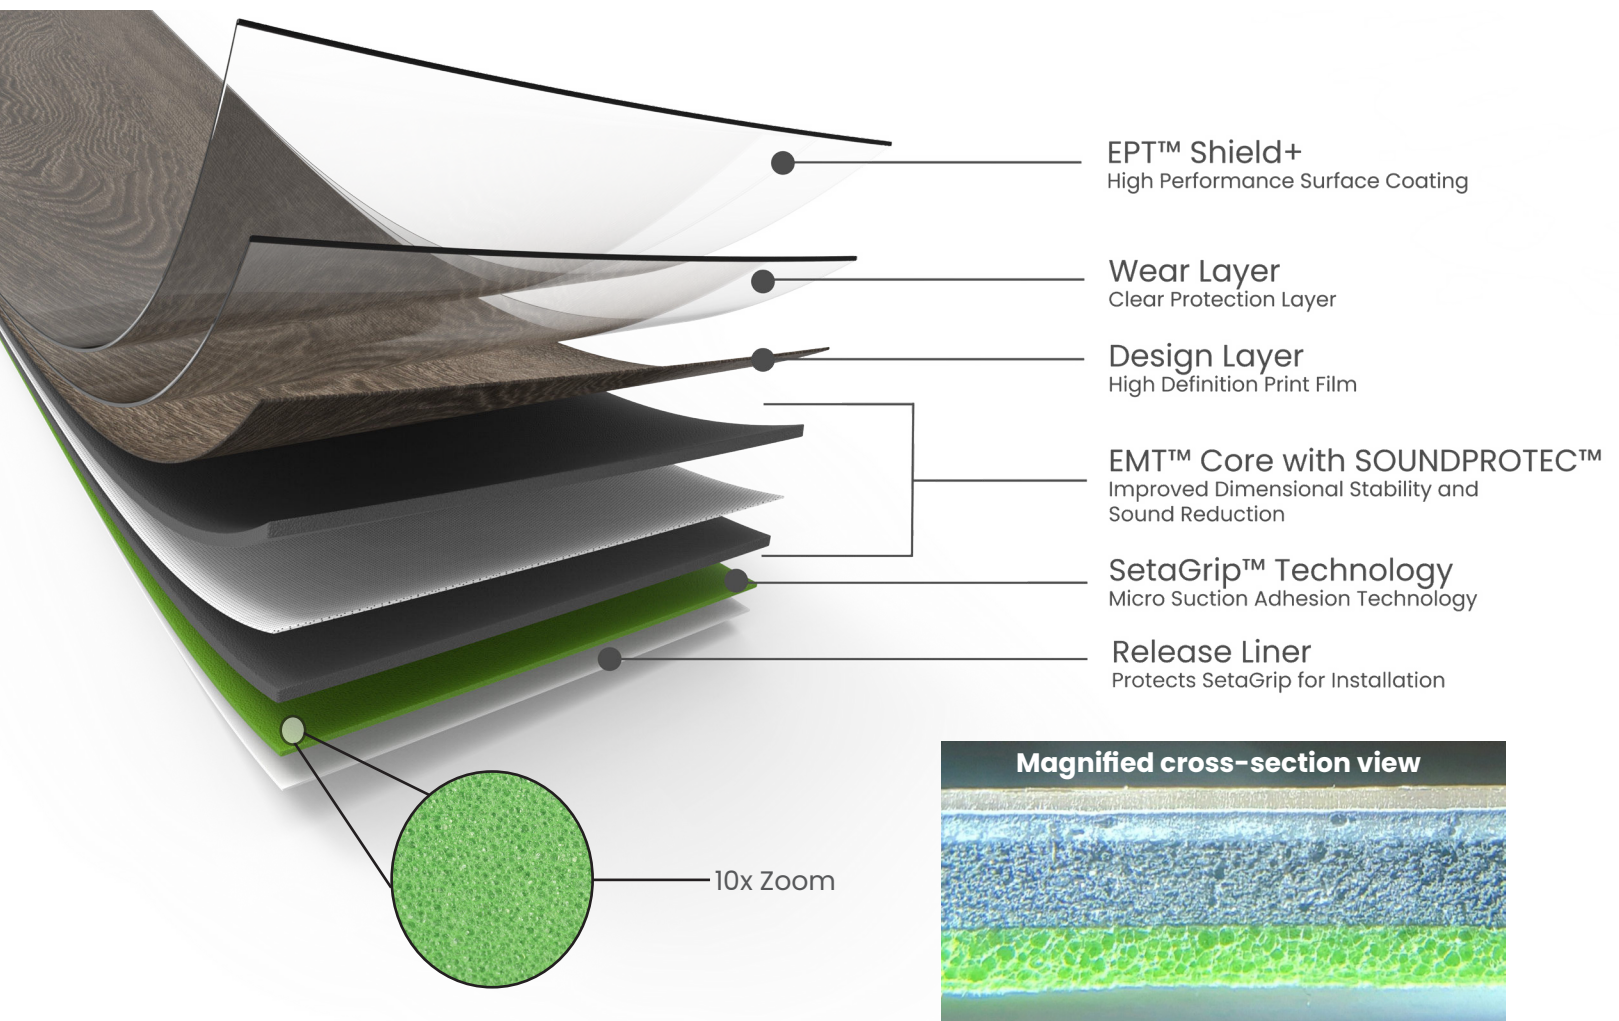

One day while watching a gecko climb a wall, we wondered, **“What makes their little feet stick so well?”**

The answer: Millions of microscopic hairs called setae (singular: seta) that act as tiny suction cups. We knew that if we could figure out how to make flooring stick like a gecko’s foot, everyone would want it.

SetaGrip™ is OneFlor’s patented micro suction adhesive technology that uses a negative fluid, vacuum pressure with millions of microscopic suction cups to securely adhere to flat, non-porous surfaces. When the flooring is pressed against a flat surface, these miniature suction cups generate a bond so strong that it will not shift, even under high foot traffic and heavy rolling loads.

Flooring can be installed directly on top of any subfloor without the need for additional adhesive. It can be removed easily leaving no residue, and can be replaced without having to redo the whole floor.

SetaGrip™ Technology is also a healthy choice. Eliminating the use of glue means no release of VOC’s or moisture associated with liquid glues.

SETAGRIP BENEFITS

NO HEAVY POWER TOOLS REQUIRED

Reducing the cost of professional labor

ADHESIVE FREE MINIMIZING PREP WORK

No downtime and covers non-porous surfaces

100% WATERPROOF & ALLERGY FRIENDLY

Prevents mold/mildew and won't trap other allergens

VAT SPECIFIC RENOVATIONS

Will not disrupt and can encapsulate asbestos tile

ICRA FRIENDLY

No dust, VOC's, or odors generated by installation

EASY MAINTENANCE

No wax, no buff, cost effective maintenance

ECO-FRIENDLY

100% recyclable virgin vinyl, zero phthalates and smell

FLEXIBLE

Prevents curling and aids in the ease of installation

SOUND INSULATING

Our **SetaGrip™** backing offers the perfect solution for reducing the noise level in high-traffic areas. Our 3.5mm product achieves a **56 IIC** over a 6" slab without a drop ceiling, making it an ideal solution for blocking sound in all commercial applications. This innovative technology will contribute to your sound reduction requirements.

QUICK, CLEAN INSTALLATION

SetaGrip™ allows you to complete an installation in half the time it would take traditional LVT installations requiring a glue down method. There is no need to close a space if renovating over an existing surface as there is no contaminants, smells, machinery or setting time.
